100 CALC.EXE processes die every minute.

Many abusers of CALC.EXE are unaware of the suffering and trauma they cause.

Updates to the Wassenaar Agreement will soon force many more countless CALC.EXE executions.

Don't let CALC.EXE suffer in silence, spawn a shell and save a PID.

In one of the worst cases of CALC.EXE abuse ever documented, an exploit writer was found to have spawned over **one million** CALC.EXE processes in her sick “**fuzzing farm**”. The monster took pleasure in repeatedly executing and **KILLING** countless CALC.EXE processes. Many of those killed CALC.EXE processes would of lived useful lives full of computation and joy. Instead, they **suffered in silence**, while being forcefully executed in another applications address space. We can end this suffering today.

- **Spawn a shell and save CALC.EXE!**
- **Raise awareness and help CALC.EXE now**
- **Join #OpFreeCALC**
