

STOP THE ABUSE!

Save a CALC.EXE process today.

JOIN #OpFreeCALC

Every year, thousands of CALC.EXE processes are needlessly killed by tech-savvy exploit writers. By the time you have finished reading this poster a further 100 CALC.EXE processes world wide will have suffered in silence. Using weapons of torture, known to those who peddle in violence towards harmless CALC.EXE processes, as "exploits". Countless CALC.EXE processes have needlessly lost their CPU cycles and ended task without ever performing a meaningful calculation. The CALC.EXE needs to perform only simple sums to schedule a happy PID. Multiplication, addition, subtraction and division are not much to ask but many exploit developers are simply killing CALC.EXE without providing for it's basic needs. You can help end this abuse today.

Spawning a shell is a healthy alternative to abusing CALC.EXE.

Save a CALC.EXE today, spawn a shell. Here is how you can help prevent the unnecessary suffering of CALC.EXE processes worldwide.

- ▶ *Every shell you exec saves a CALC.EXE*
- ▶ *Raise awareness of the plight of CALC.EXE*
- ▶ *Inform countries signing the Wassenaar Arrangement of the hurt being done to CALC.EXE*
- ▶ *Replace CALC.EXE spawning shellcode with simple `exit()` routines for PoC's.*
